YOUR PARTNER IN PROMOTIONAL BOTTLES

Can anyone say they have never seen a Tacx bottle? Probably not. Based in the Netherlands we are an industry leading specialist, producing, and printing bottles for over 25 years. Renowned for outstanding high quality imprints, client relations and fast lead times. The collection is divided into the categories Eco, Lifestyle and Sport. Quite simply, there is a bottle with a message suitable for every occasion.

Moreover, we are consciously in line with today's demand: we are not only increasingly aware of a healthy lifestyle, but we also focus on environmentally friendly products. The bottles are produced in an ethical manner under controlled conditions. For the development of our products, we are constantly searching for new raw materials that are greener, cleaner and are as environmentally friendly as possible. In Addition, to keep quality at a high level we continuously test, measure, and report all processes in our Sedex certified factory and ISO certified printing facility.

This might all sound very technical, but our goal is to make a positive contribution to the world with a sustainable product at a competitive price.

Daiya, the new Tacx bottle with an edgy look and feel

Make a bold statement by choosing the durable Daiya bottle. The diamond shaped cap for extra grip is certainly an eye catcher. The most prominent features include the leakproof one twist cap and the soft pull nozzle with a high flow water rate for instant hydration. To top it all off, the Daiya has an extra-large fill opening that makes it handy to refill and easy to clean, it is dish washer safe and BPA free.

Comes in a range of signature colours. Eco options available. Fits all bottle cages. 100% recyclable. Refillable.

Positive contribution to the Environment

We all recognize the fact that the world requires a collective effort to reduce its environmental impact. As a business, our goal is to make that difference, therefore we produce high quality durable bottles with a low carbon footprint that are also 100% recyclable. This massively contributes to the reduction of Single use plastics. To go one step further, as well as our original collection, we produce bottles made from ecofriendly raw materials such as bio-based polyethylene made from sugarcane and biodegradable polyethylene. In doing this, we are tackling the reduction of carbon emissions.

Check out the range

Biodegradable

Freight

This bottle is made of polyethylene with a bio-batch additive. This additive changes

the molecular structure of the bottle. It has no effect on the use of the bottle until

it reaches a landfill or is left in the forest. At the correct temperature, the biobatch

activates and the bottle decomposes into water, humus, and gas. The whole

composting process takes about one to five years. In nature this takes longer.

About us

100% Biobased made from sugarcane

This bottle is made of 100% biobased material from sugarcane. From the residual sugarcane material, we process polyethylene that is used for our bottles. This process is much cleaner than the conventional methods and has a nice added benefit: as the sugarcane grows, it removes CO2 from the air.

Available in black. Pantone match available from 500 pcs.

Tech info

File specifications

- Adobe Illustrator 8.0 or higher (eps or vector ai file)
- Adobe Photoshop 5.0 or higher (or Adobe in-Design)

Fonts

- · Mac user: please put the letter type in outline and send us the Fonts
- · PC user: always change letters into outline

Print area

- Bidon 450ml: 195 x 140 mm
- Bidon 500ml: 235.5 x 100 mm
- Bidon 750ml: 235,5 x 100 mm & 235,5 x 29 mm (upper print area)

Distance between upper and lower part of imprint of the 750ml bottle is 95 mm (heart to heart print).

All-round printing

With an all-round print the beginning and end of the print area will come together at the back causing a blemish line. This must be accepted. As an alternative you can choose a 5mm opening.

Top print area 750ml bottles

When printing on the upper part of the 750ml bottle, the top print is considered additional printing colors. So, 2 colors above and 2 below means a total of 4 printing colors.

Full colour process print: CMYK

It could be, that part of the design has to be made up in CMYK and an aditional spot colour. For example, text with a specific pantone colour. Therefore, to ensure your calculations are correct, please always send us the artwork to check the number of print colours required.

Silk screen prints

For each print colour we make an individual screen. We can print up to 12 colours. Our state of the art printing machine prints 6 colours in one production run.

Printing full colour

When printing a multiple colour design, where the colours meet a 0,5 mm tolerance in closure must be accepted. When printing full colour process CMYK, the end result is mat, pixelated and can deviate from the visual proof. Our raster size is 34 dpi.

Printing on coloured bottles

To print a pantone colour onto a coloured bottle, it's necessary to print a white underlay first. No white underlay is required for grey tints, gold, silver and white. In some cases an outline is visible and has to be accepted. The white underlay is calculated as one extra print colour and one extra screen. If white is already part of the design, there is no extra white underlay required. If in doubt, please contact us for information.

Dark bottles + Top of Shanti cap

Dark bottles and the Shanti caps are unfortunately very sensitive to scratches and scuff marks. This must be accepted.
